Primary Examiner, Art Unit 2836

9/13/2009

The Drawings submitted on 6/30/2009 have been Approved.

The following is an Examiner's Statement of Reasons for Allowance: The claimed combinations found within Independent Claims 1 and 9 are considered to be novel and unobvious in view of the Prior Art of Record. The claimed combination of Claim 1 includes an electrostatic charge remover utilizing soft X-rays and wherein an ion generating tube uses a thin film of Beryllium (Be) evaporated with Tungsten (W) as window material. Although Beryllium and Tungsten (see Ohmi et al. (5,570,011) are known window materials, the Prior Art does not make obvious the claimed combination with the evaporated Tungsten. The Reference (3,012,163) to Goss appears to avoid Tungsten deposition on a Beryllium window. Although Bristow (3,023,492) teaches certain aspects pertaining to the method of making of the claimed combination of Claim 9, it is clear that none of the Prior Art of Record anticipates the combination. Furthermore, it is the opinion of the Examiner that only with hindsight would it have been obvious to incorporate the teachings of Bristow with those of x-ray tube teachings so as to try and meet the claimed combination of Claim 9 which includes such specific limitations as utilizing silk screening of Mo-Mn paste on a ceramic tube, utilizing filler metal of Ag of 73% and Cu of 27% over the anode surface, coating W over the Be window plate and performing high vacuum brazing with a vacuum furnace at 900 degrees C.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably

accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
